

Obverse Die O2X-L4 – Obverse C3a

- This large cent was detected on-line, in January 2023. The images of various attributes are obscured.
- Appears to not have a chip near the 'N' in REGINA, but if it is later deemed that a chip is present, when other examples are seen in hand, a re-designation to O2W-L6 would be warranted.
- Besides die O2Y-S2, this is the only other known obverse C3a die to have a 'T' re-punched (in this case the T in VICTORIA) with the elongated serif 'T' of the PEI cent. This is therefore a CERT die identifying feature.

Die used on relatively few 1891 Obverse C3a cents

Mated with reversed die: R10- L38

Obverse Die O2X-L4 – Obverse C3a

'D' in DEI

'C' in CANADA (possible break)

'N' in REGINA (no chip ?)

'N' in CANADA (with appendage)

'T' in VICTORIA
(repunched using elongated
serif 'T' from PEI cent)

'T' in GRATIA

Die used on relatively few 1891 Obverse C3a cents

Mated with reversed die: R10- L38

Reverse Die R10-L38

- This coin was detected on-line and therefore the images of various attributes is obscured. It is the only one seen so far by this author.
- The single die crack through L15 is unique and not known on any other reverse dies. Dies R10-L34 and R10 - L36 have no known die cracks however their dates do not seem to match this die.

L15

Die used on relatively few 1891 Obverse C3a cents

Mated with reversed die: O2X-L4
